

Parent / Teacher Dinosaurs Guide

Dinosaur factsheets

The factsheets provide basic information about each dinosaur as well as some interesting facts about them. They match the dinosaurs from the worksheets sheets so learn while having fun creating.

Classroom display

To encourage students to learn together this section provides all the materials needed for a fun wall “dinosaur park”. Students create and learn about their own dinosaurs. Then combine the class work into a mural on the wall for students to enjoy and share knowledge.

Printables

Our dinosaur printables section contains fun and useful printables for all levels and of many types. There are fact booklets containing information, art related activities, dot to dots and more!

Homework

On top of the activity and materials provided for class work, we have numerous activities that would suit being assigned as homework. Students can learn more about dinosaurs themselves as well reinforce the learning from class.

Whiteboard resources

These activities have been developed to be used with a smart whiteboard to encourage group involvement of the class.

Share your work with the world!

Please send us photos of your dinosaur park so we can add them to this page for everyone to see.

Free Home Access

Students can access all these resources from home or school for free. Use the 'Home access' button on the top of the site to print details students can use to take home and show parents.
